EXPERIENCE

PlanGrid Product Designer

Product design and field research to improve productivity on large construction projects. Delivered on iOS, Android, Web, and Windows. Contributed to design system process and component library. Trained new hires in Design 101.

December 2016 - Present San Francisco, United States

Kinsa Health User Experience Designer

Led mobile design and user research at this Series A startup with a big mission to keep families healthy. Hired and mentored designers. Worked with external partners on industrial design, packaging, and Sesame Street licensing.

April 2015 - October 2016 San Francisco, United States

The Home Depot Techshed Senior User Experience Designer

Researched and designed an e-commerce mobile application for 500,000 professional contractors. Built a unique pro experience distinct from the DIY market. Led ideation of next-generation products and features.

March 2014 - April 2015 San Mateo, United States

Redbeacon.com User Experience Designer

Ran user research and designed flows for a two-sided marketplace, matching homeowners with professional contractors to complete home improvement projects. Ensured a clear and unified service experience across web, mobile, and real-world contexts. First hire after acquisition by The Home Depot.

March 2012 - March 2014 San Mateo, United States

GlaxoSmithKline Behavioral Science Research Intern

Researched, designed, and prototyped an adherence tool for Nicorette and Nicoderm CQ with a small team, continuing research from a graduate course. Delivered a comprehensive report including manufacturing and marketing plans.

May - July 2011 Pittsburgh, United States

ACADEMIC EXTRACURRICULAR

Chicago Booth School of Business

Studied accounting, finance, marketing, capital markets, and competitive strategy at the University of Chicago's Summer Business Scholar Program.

July - August 2011 Chicago, United States
